Our Journey

2) Senior Performance

Record Customer Growth: Increased from 1,200 to 1,850 customers.

Dyngut Cancer through AI Revenue Trends

Dyngut Cancer through AI is pleased to announce that it has achieved **record customer growth**, increasing its customer base from 1,200 to 1,850 customers. This represents a significant milestone in the company's journey to expand access to its innovative AI-powered oncology nutrition coaching platform.

The growth in customer acquisition is a testament to the increasing demand for personalized, data-driven nutrition solutions for cancer patients. Dyngut Cancer through AI's platform has been well-received by both patients and healthcare providers, who appreciate the platform's ability to provide tailored nutrition plans that are optimized for each patient's unique genetic profile, medical history, and lifestyle.

"We are thrilled to see the rapid adoption of our platform by cancer patients and healthcare providers," said [Name], CEO of Dyngut Cancer through AI. "Our team has worked tirelessly to develop a solution that can truly make a difference in the lives of cancer patients, and we are encouraged by the positive feedback we have received so far."

The company's success can be attributed to its strong focus on customer engagement and support. Dyngut Cancer through AI has invested in a dedicated customer success team that provides personalized support to patients and healthcare providers, ensuring that they are able to get the most out of the platform.

In addition to its customer growth, Dyngut Cancer through AI has also made significant progress in expanding its partnerships with leading healthcare organizations. The company has recently announced partnerships with [Partner 1] and [Partner 2], which will enable it to reach a wider audience of cancer patients and provide them with access to its innovative nutrition solutions.

Looking ahead, Dyngut Cancer through AI is well-positioned for continued growth and success. The company has a strong team in place, a proven track record of customer acquisition, and a growing network of partnerships. With its innovative AI-powered platform, Dyngut Cancer through AI is poised to make a significant impact on the lives of cancer patients around the world.

Strategic Partnership with Labcorp

Dyngut Cancer through AI has formed a strategic collaboration with Labcorp, a leading provider of diagnostic services. This partnership will integrate Dyngut Cancer through AI's platform with Labcorp's oncology diagnostics, enabling a more comprehensive approach to cancer nutrition management.

The collaboration will leverage Labcorp's extensive network of healthcare providers and its expertise in genetic testing to identify patients who can benefit from Dyngut Cancer through AI's personalized nutrition plans. By combining Labcorp's diagnostic capabilities with Dyngut Cancer through AI's AI-powered platform, the partnership aims to improve patient outcomes and reduce the burden of cancer-related malnutrition.

"We are excited to partner with Labcorp, a leader in the field of oncology diagnostics," said [Name], CEO of Dyngut Cancer through AI. "This collaboration will allow us to bring our innovative nutrition solutions to a wider audience of cancer patients and help them achieve better health outcomes."

Labcorp's Chief Medical Officer, [Name], also commented on the partnership, stating, "We believe that nutrition is a critical component of cancer care, and we are committed to providing our patients with the best possible support. Dyngut Cancer through AI's platform is a valuable addition to our portfolio of services, and we are confident that it will help us to improve the lives of our patients."

The partnership is expected to launch in the first quarter of 2024, with Labcorp initially offering Dyngut Cancer through AI's platform to its network of healthcare providers in the United States. Dyngut Cancer through AI and Labcorp will also collaborate on research studies to further evaluate the impact of nutrition on cancer outcomes.

Strategic Partnership with Stockholm Imaging

Dyngut Cancer through AI has entered into a partnership with Stockholm Imaging, a leading provider of medical imaging solutions. This partnership will integrate Dyngut Cancer through AI's platform with Stockholm Imaging's advanced imaging technologies, enabling a more comprehensive approach to cancer nutrition management.

The collaboration will leverage Stockholm Imaging's expertise in medical imaging to identify patients who can benefit from Dyngut Cancer through AI's personalized nutrition plans. By combining Stockholm Imaging's diagnostic capabilities with Dyngut Cancer through AI's AI-powered platform, the partnership aims to improve patient outcomes and reduce the burden of cancer-related malnutrition.

"We are excited to partner with Stockholm Imaging, a leader in the field of medical imaging," said [Name], CEO of Dyngut Cancer through AI. "This collaboration will allow us to bring our innovative nutrition solutions to a wider audience of cancer patients and help them achieve better health outcomes."

Stockholm Imaging's Chief Medical Officer, [Name], also commented on the partnership, stating, "We believe that nutrition is a critical component of cancer care, and we are committed to providing our patients with the best possible support. Dyngut Cancer through AI's platform is a valuable addition to our portfolio of services, and we are confident that it will help us to improve the lives of our patients."

The partnership is expected to launch in the first quarter of 2024, with Stockholm Imaging initially offering Dyngut Cancer through AI's platform to its network of healthcare providers in the United States. Dyngut Cancer through AI and Stockholm Imaging will also collaborate on research studies to further evaluate the impact of nutrition on cancer outcomes.
